Career Goals

Short-term goal: My short-term goal is to enhance my proficiency in Frontend development, particularly by deepening my knowledge of HTML, CSS, JavaScript, and modern frameworks like ReactJS. I also aim to improve my understanding of UI/UX design principles to create more user-friendly and visually appealing interfaces. Additionally, I want to gradually build a solid foundation in Backend technologies, such as Node.js and databases, to prepare myself for full-stack development.

Long-term goal: My long-term goal is to become a highly skilled Full Stack Developer capable of building complete web applications from the ground up. I want to master both frontend and backend technologies and gain experience in working on real-world projects. Ultimately, I aim to contribute to the development of scalable, efficient, and impactful software solutions, whether as part of a professional team or through my own independent projects.

Skills

Frontend: Possess basic skills in HTML, CSS, JavaScript, UI/UX, and some JavaScript libraries and frameworks such as ReactJS, Bootstrap 5, and Axios.
